About AOGIN

More than 50% of cervical cancer cases in the developing world occur within the Asian-Pacific region. Therefore, we have developed an expert multi-disciplinary group within the region and along the lines of European Research Organization on Genital Infection and Neoplasia (EUROGIN) / European Course on HPV Associated Pathology Virus (EHPV), as developed for Europe and, more recently, Latin America. AOGIN works with health care workers (as well as the lay public), particularly those in women's health with the goals of collaboration and research, scientific exchanges, education and training, providing information, surveys and audits. AOGIN brings together clinicians and scientists whose work is related to genital infections and neoplasia.

A few of the Lecture topics...

- Natural History of HPV
- Immunology of HPV
- Molecular Aspects of HPV
- Cervical Cancer Burden in Asia
- Cervical Cancer Screening efforts of WHO/IARC
- HPV as a test of cure following treatment for CIN – the UK Experience
- HPV testing: How and whom?
- HPV E6 and E7 associated cervical carcinogenesis
- HPV Infections in Males
- HPV Vaccine Updates
